Norcross, GA 30092

U.S.A.

You will find much more detailed and complete information in the User's Manual.

Step 1: Activate Cellular Service

Cellular service is required if you want to have photos delivered to email and/or your mobile device, regardless of whether you use GoWireless Premium or GoWireless Auto. Cellular service enables the camera to send photos.

There are three ways to activate cellular service for your GoCam. Please read about the three ways to obtain service so you can choose the one that works best for you. Before you begin, locate your MEID number, which is printed on a sticker inside the camera.

Activate Online

1. Using a computer or tablet with an Internet connection, go to VerizonWireless.com/certifieddevice/.
2. Follow the steps to activate your camera. When prompted for a device type in Step 1, choose Connected Device.

Activate by Telephone

You can activate your Verizon GoCam either by calling the Verizon support number, 800-775-8098, or by calling 611 from your Verizon cell phone. Listen to the menu options and follow the prompts to activate the service.

Activate at a Verizon Store

You may take your camera to a Verizon store and have an in-store customer service rep activate service for you.

Record your camera's telephone number: _____

Step 2: Set Up the Camera

1. With the power switch **OFF**, insert batteries into the battery compartment. Use 12 (recommended), 8, or 4 (emergency, left 2 columns) 1.2-1.5v AA batteries.

The following types of batteries can be used:

- High-performance alkaline
 - Lithium
 - Rechargeable NiMH
2. Insert an *unlocked* SD card (up to 32 G) into the SD card slot. Refer to the card symbol on the case for proper orientation.
 3. With the rubber gasket between the base of the antenna and the antenna jack on the top of the camera, screw the antenna onto the antenna jack. The rubber gasket must be in place to prevent leaks. Make sure the antenna is screwed in all the way but be careful not to over-tighten it.

Step 3: Connect the camera to the Verizon network

1. Slide the power switch to the **SETUP** position. The camera will enter *Preview* mode.
2. The screen will display *Searching network...*, then *Verizon* will appear at center top of the screen and the signal strength bars will show in the top right corner.
3. Press the **Menu** button to access the *Setup* menu.
4. Navigate to the *Wireless* tab (far right), then down to *Diagnostic* using the buttons:
 - Press ◀ or ▶ to move among the tabs (submenus).
 - Press ▲ or ▼ move among the submenu items.
 - Press ◀ or ▶ to change the value for an item.
 - Press **OK** to save all changes you've made to in a particular tab.

- Press **Menu** return to the main menu (tabs) or to exit *Setup* mode (back one level).
5. With *Activate/Data Reboot* highlighted, press the **OK** button.
 A pop up box will show
Wait...
*Dial *22899 (Please wait).*
 Then you'll see a message that says:
Successful!
Restarting. Please wait.
- (If the *Dial *22899* window just disappears, restart the camera manually.)

Step 4: Set up the camera to send photos

There are two ways to set up your camera to deliver photos: GoWireless Premium and GoWireless Auto. GoWireless Auto offers very basic functions, by delivering photos via email and/or MMS. GoWireless Premium offers a more modern, easier-to-use interface with extra features. For a detailed comparison of the two, please refer to the section *GoWireless Premium vs. GoWireless Auto* in the User's Manual.

	GoWireless Premium	GoWireless Auto
Additional Cost	\$3-4/month	Free
Features	Enhanced user experience Gives customer access to their camera(s) via the web and mobile app on both iOS and Android devices. Every camera comes with one month free so you can try it, no strings attached.	Basic functions. The camera sends pictures to email address (es) or sends to cell phone as MMS messages. (Similar to first-generation 2G cameras.)

1. With the camera in SETUP mode and logged into the network, press the **Menu** button, navigate to the **Wireless** tab and then to **Send Via**.
2. Choose either *GoWireless Prem* or *GoWireless Auto*, then follow the appropriate instructions below:

GoWireless Premium Setup	GoWireless Auto Setup
<p>3. With <i>Send Via</i> set to <i>GoWireless Prem</i> (default) scroll down to <i>Register Camera</i> then press the OK button. A pop up box will show. <i>Camera registering...</i> Then you will see: <i>Module ID/ MEID: Axxxxxxxxxxxxx</i> <i>Registration Code: xxxxx</i></p> <p>4. Write down the Registration Code. The MEID should be the same one that's on the camera body.</p> <p>5. For rest of the setup process, do <i>one</i> of the following:</p> <ol style="list-style-type: none"> a. Watch this YouTube video: http://tinyurl.com/hyffgg5 b. Refer to <i>GoWireless Premium Setup</i> in the User's Manual c. Go to https://www.spartancamera.com/troubleshooting#_configprem 	<p>3. Set <i>Send Via</i> to <i>GoWireless Auto</i> then press the OK button.</p> <p>4. Scroll down to <i>Recipients</i>, then press the OK button.</p> <p>5. With <i>Email</i> selected, navigate to any entry box then press the OK button.</p> <p>6. Use the keypad to enter up to four destination email address (es). This refers to both regular email addresses and device email addresses in the carrier's email format (e.g., 5555551212@vzwpix.com or 5555551212@mms.att.net).</p> <ol style="list-style-type: none"> a. Press the Del to backspace. b. Use the arrow keys to navigate to

GoWireless Premium Setup	GoWireless Auto Setup
	<p>the button containing the letter you want.</p> <p>c. With the cursor on the button containing the letter, press the OK key multiple times to get the letter you want. For example, to enter C, with the <i>ABC</i> button highlighted, quickly press the OK button 3 times.</p> <p>d. Highlight <i>Save</i> then press the OK button to exit.</p> <p>7. <i>Image From</i>: enter the name for your camera that will appear in the <i>From</i> field on the picture email. This will not appear on the info strip at the bottom of the photo.</p> <p>8. Press OK to save your changes.</p> <p>9. Press Menu to return to the main menu.</p> <p>10. Set the other parameters (<i>Camera, Trigger, System</i>) using the information in the tables in the User's Guide. It is probably best to set the clock last.</p> <p>11. Once you have set all the parameters, press Menu to return to the <i>Preview</i> screen.</p>

Step 4: Send a test photo

1. With the camera in SETUP mode and logged into the network, press the **OK** button to take a photo.
The camera will ask you
Send this photo?
2. With Yes selected, press the **OK** button to send.
The camera will show:
Setting...
Sending...
Sent!
3. Check your email, phone, web account or mobile app for the picture.
